

How automated cyber risk management provided assessment, report and remediation in four days to prevent OCR fine

Imagine finding your protected health information (PHI) on a widely known collaborative website. Not just your information, but that of thousands of patients. Thankfully, this patient immediately notified their medical practice. The practice sought the appropriate help, but the damage was done.

When a seemingly impossible deadline was set, **CyberCompass™** came to the rescue, preventing an estimated **\$500,000 fine**.

Not

Prepared to Respond

The provider is a well-established healthcare practice with over 150 employed staff throughout 4 locations.

They suffered a minor breach by today's standards and reported the incident to the Office of Civil Rights (OCR). As a result, the OCR requested a risk assessment from the client.

The original assessment, completed by the client's attorney, was deemed inadequate by the OCR.

An impossible task

The OCR required an adequate assessment and risk management plan. The new law firm estimated a \$500,000 fine. Other companies quoted 10 weeks at double the cost for the assessment alone. With only 2 weeks to deliver, they found **CyberCompass™**.

CyberCompass™ only needed 7 days at half the cost to provide the assessment, audit ready report, risk management plan they needed.

CyberCompass™, an automated cyber risk management platform, was utilized to complete:

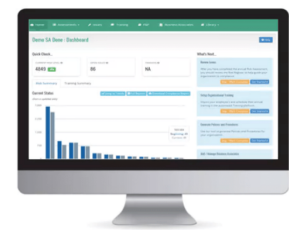

- Comprehensive assessment of twelve interview surveys
- Four facility inspections
- System vulnerability and compliance scans
- Generation of audit ready report; overall and dept risks
- Generation of risk mgmt plan and policies & procedures

Rapid Response: Completed in 4 days

CyberCompass™, with the unique capability for multiple users to perform multiple assessments simultaneously, completed the task in just four days.

Body of Evidence Delivered

CyberCompass™ generated the audit report, risk management plan, policies and procedures and strategic plans immediately.

HHS OCR dismissed the case, approving all provided evidence with no penalty!
